

KAUSHIK BOORA

📍 Irving, TX | ☎ (857) 230-5227 | ✉ kaushikboora2@gmail.com | [in LinkedIn](#) | [🌐 GitHub](#) | [📁 Portfolio](#)

SUMMARY

MSCS professional with 2+ years experience developing large-scale applications. Proficient in Angular, React, Java, Spring Boot, Node.js, MySQL, GitHub. Recognized for collaboration, communication, problem-solving skills and eagerness to learn.

EDUCATION

Northeastern University (Khoury College of Computer Science) – Boston, MA, USA **January 2022 – April 2024**
Currently enrolled in master's in Computer Science (MSCS) **GPA: 4.0**

Courses: Programming Design and Paradigm, Web Development, Algorithms, Foundations of Software Engineering.

Chaitanya Bharathi Institute of Technology (CBIT) - Hyderabad, India **September 2016 – November 2020**
Bachelors of Engineering in Electronics and Computer Engineering **CGPA: 8.87**

Courses: C Programming, Object Oriented Design, Java, Python, Data Structures, Machine Learning, Internet of Things(IoT).

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL, TypeScript, C.
Frameworks: Angular, React, Spring Boot, Node.js, ExpressJS, Django, JUnit, Mocha, JEST, Playwright, Cypress, Scrum.
Libraries: Redux, jQuery, FormatJS, JWT, Multer, Chai, Javadoc, JSDocs, JsMockito.
Web Technologies: HTML, CSS, Bootstrap, RESTful APIs, XML, JSON, HTTP, TCP/IP, Chrome DevTools, Firefox, Safari.
Databases: PostgreSQL, MySQL, MongoDB (NoSQL), Neo4j, DB2.
Tools: NPM, Angular CLI, JIRA, GitLab, Confluence, Artifactory, Bitbucket, Google Lighthouse, WebPageTest.org.

EXPERIENCE

Consultant II – EXL Service, (CVS Health) | Dallas, TX **June 2024 – Present**

- Enhanced Web Components using Angular, developed APIs using **Java Spring Boot**, Maven to present data stored on BigQuery.
- Developed unit tests using Jasmine, implemented e2e tests using Postman, JMeter ensuring robust software quality and stability.
- Articulated best practices, reviewed high quality code, in code reviews on **GitLab** in **Agile** environment enhancing 34% code quality.
- Employed **Jenkins, Docker, Kubernetes** for containerization, orchestration; Effectively deployed, monitored services on **GCP**.

Software Engineer Co-op – Bitsight Technologies | Boston, MA **December 2022 – July 2023**

- Created full stack applications using JavaScript, **React**, focusing performance, reliability, maintainability, improving 50% efficiency.
- Worked on prioritizing tasks using JIRA, writing unit and automation tests using JEST, Cypress, achieving code coverage of 99%.
- Internationalized 60+ web pages using FormatJS, CI/CD pipelines to automate tests using Jenkins in a TDD development team.
- Collaborated to develop Micro-Services REST APIs using Java, Spring Boot, **Spring Core**, handling 100000+ requests per minute.

Graduate Teaching Assistant (CS5610) – Khoury College of Computer Science | Boston, MA **May 2022 – May 2024**

- Instructed 110+ Graduate students in Web Development, covering Java, Spring Boot, SQL, jQuery, JavaScript, React, Ajax, **Node.js**, ExpressJS, MongoDB Technologies. Mentored 70+ students to learn angular UI.
- Organized Office hours and monitored Piazza for query resolution, addressing 1000+ student inquiries.

Software Developer – Cognizant Technology Solutions | Hyderabad, India **January 2021 – January 2022**

- Collaborated in a Full stack application development team, to devise responsive HTML5, CSS3, **TypeScript, Angular** frontends.
- Led **JWT**-based authentication middleware implementation, bolstering app security by 60%, employed Docker for containerization.
- Developed REST APIs using Java, Spring Boot, DB2, performed Micro-Services testing using Junit, bolstering 60% code quality.
- Built highly interactive web-based application UIs with Custom Async Validator that can scaled with application complexity.

Software Engineer – Research Center Imarat, DRDO | Hyderabad, India **January 2020 – February 2021**

- Engineered **Python**-based Facial Recognition system for 1000+ employees, generating reports, and deploying on FPGA+MPSOC.
- Took responsibility of development, design to coding to ensuring a high degree of quality by testing and automation.

PROJECTS

Restaurnt Review Site 🌐 [Git](#) | **Java** | **Maven** | **Spring Boot** | **Hibernate** | **JWT** | **MySQL** | **JPA**

- Fabricated 30+ scalable Spring Boot Micro-Services **RESTful APIs** following DTO design pattern for efficient CRUD operations, facilitating user interaction with restaurant reviews and comments. Executed JWT authentication and robust API security.
- Designed and executed an efficient database schema utilizing **Hibernate** and JPA, enhancing data storage and retrieval performance.

SARK Product Review Site 🌐 [Git](#) | **React** | **Redux** | **ExpressJS** | **Node.js**

- Led 4-student team in web app development. Created secure Node.js/ExpressJS APIs with JWT authorization for **CRUD** operations.
- Designed React-Redux frontend with role-based access for 10+ responsive pages.

Bus Ticketing System 🌐 [Git](#) | **angular UI** | **Node.js** | **ExpressJS** | **MongoDB** | **TypeScript**

- Developed angular UI-Bootstrap frontend for bus ticket booking, integrating 30+ RESTful APIs (Node.js, ExpressJS, MongoDB).

ACHIEVMENTS

- Earned CBIT's Gold Medal for Academic Excellence, a testament to dedicated achievements recognized by the Dean.
